

Arshal Rejith S

Full Stack Developer | Software Engineer

iamarshalrejith@gmail.com | linkedin.com/in/arshal-rejith17 | github.com/iamarshalrejith | leetcode.com/u/arshalrejith

PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate with hands-on experience designing, building, deploying, and maintaining production-grade full-stack web applications. Independently developed and launched WedCraft, a live SaaS platform for customizable digital wedding invitations with secure payments, subscription management, and cloud deployment. Completed a Machine Learning internship at Infosys Springboard, contributing to an AI-powered hospitality assistant that reduced query resolution time by 35% using RAG pipelines. Proficient in Next.js, Node.js, TypeScript, MongoDB, REST APIs, and modern AI technologies, with a strong focus on building scalable, user-centric software.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C/C++

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Redux Toolkit, GSAP, Framer Motion

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT, OAuth, WebSockets

Databases: MongoDB Atlas, MySQL, Firebase, ChromaDB

Tools & Platforms: Git, GitHub, Linux, Vercel, Socket.IO

Integrations: Razorpay, Google OAuth, Cloudinary, Resend

AI & ML: LangChain, RAG Pipelines, CrewAI, Groq, TensorFlow.js, MediaPipe, NumPy, Pandas, Matplotlib

PROJECTS

WedCraft – Full Stack SaaS Wedding Invitation Platform

Mar 2026 – Apr 2026

Next.js 15, TypeScript, MongoDB Atlas, Razorpay, Google OAuth, Cloudinary, Vercel

wedcraft.in — github.com/iamarshalrejith/WedCraft

- Sole developer of a production SaaS platform for customizable digital wedding invitations, featuring 23+ templates, subscription-based monetization, and deployed on Vercel.
- Engineered a secure payment and subscription system using Razorpay with HMAC signature verification, webhook handling, coupon management, automated first-time purchase discounts, and transactional email delivery via Resend.
- Implemented secure authentication using email/password and Google OAuth 2.0 with JWT-based session management, server-enforced edit limits, and tier-based invitation expiry.
- Developed user and admin dashboards supporting RSVP tracking, invitation analytics, QR code generation, template and coupon management, and Cloudinary-backed media storage.

GoOrbit – Distributed Peer-to-Peer File Storage System

Jun 2026 – Jul 2026

Go, TCP Networking, Peer-to-Peer Systems, Content-Addressable Storage, File Streaming

github.com/iamarshalrejith/GoOrbit

- Developed a decentralized peer-to-peer file storage system in Go featuring custom TCP transport, peer discovery, bootstrap networking, and content-addressable storage for scalable, distributed file management.
- Engineered a concurrent networking layer using Go goroutines and channels with RPC-based communication, metadata-driven file replication, and stream-based large file transfer for efficient data distribution across connected peers.
- Implemented AES-based file encryption, content hashing, metadata management, file deletion, and integrity checks while designing reusable transport and storage abstractions for extensibility and maintainability.

DownX – AI-Powered Inclusive Learning Platform

Sep 2025 – Apr 2026

MERN Stack, Google Gemini API, TensorFlow.js, MediaPipe, Redux Toolkit, Tailwind CSS

github.com/iamarshalrejith/DownX

- Developed an AI-powered learning platform for students with Down syndrome, leveraging the Google Gemini API to transform teacher instructions into accessible learning content and MediaPipe with TensorFlow.js for real-time gesture-based interaction.
- Designed and implemented a secure REST API backend using Node.js, Express.js, MongoDB, and JWT authentication, paired with a WCAG-compliant React frontend optimized for cognitive accessibility.
- Built three adaptive learning modules, including speech therapy exercises, gamified learning activities, and progress tracking, with real-time teacher dashboards for monitoring student performance.

PROFESSIONAL EXPERIENCE

Machine Learning Intern (Virtual)

Dec 2024 – Jan 2025

Infosys Springboard

- Collaborated with a four-member cross-functional team to build StayAI, an AI-powered hospitality assistant using Retrieval-Augmented Generation (RAG) and multi-agent orchestration with LangChain, CrewAI, Groq, and ChromaDB
- Integrated a FastAPI backend with a Streamlit frontend to serve real-time concierge features including personalized guest support and automated service coordination
- Achieved a 35% reduction in query resolution time and over 90% accuracy in simulation testing; designed a vector-based knowledge retrieval system enabling 24/7 AI-powered assistance

EDUCATION

B.Tech in Computer Science Engineering – IoT Specialization

Aug 2023 - May 2027

Shiv Nadar University, Chennai

- Relevant coursework: Data Structures and Algorithms, DBMS, Operating Systems, Machine Learning
- Certifications: NPTEL Affective Computing (Gold Badge), NPTEL Programming in Java (Gold Badge), Infosys Springboard Machine Learning Program
